(32~34)

Dear Teddy,

I know you won't be happy but I still have to say this again. It hurts me to think that you're going to change the way you are. I know you've always wanted to be like those actors with big eyes and small faces, but in fact you are already handsome. What you are born with makes you unique because nobody looks the same as you.

It worries me more that you don't think you are good enough. But sadly, there's no quick fix to this, not even with a doctor's help. If you don't try to like yourself first, no one else will. People like you not because of your face, but because of your heart. You need to understand this first. Until you understand this, nothing is going to be different even if you have this change.

34. _____

Love,
Linda

32. What can we learn from the reading?

- (A) The writer hopes Teddy can fix his problem from liking himself first.
 (B) The writer feels happy to know Teddy thinks he has a good heart.
 (C) Teddy wants to be as handsome as those actors and have lots of fans like them.
 (D) Because of the doctor's help, Teddy will change his face and be more famous.

 himself 他自己

33. What does it mean when we say someone is unique?

- (A) He / she is not good.
- (B) He / she is not different.
- (C) He / she is handsome.
- (D) He / she is special.

34. What is the best sentence for 34. ?

- (A) I hope you think this through again.
- (B) I need you to ask for the doctor's help.
- (C) I think you could be a famous actor one day.
- (D) I know you understand yourself better than I.

(35~36)

When we get wet, we need a towel to get ourselves dry. When a dog gets wet, all it needs is to shake its body. A study in 2010 showed that a wet dog can throw off half the water on its body by shaking for less than a second. In fact, this common act of dogs works better than a washing machine.

The study found that animal shaking begins with the head and ends with the tail. During a shake, the animal's head, body and skin all move. Smaller animals must shake faster than bigger animals to get water off. For example, in one second, a rat can shake 18 times, a dog 6 times, and a bear 4 times. Bigger animals can get their bodies dry with fewer shakes.

For animals, shaking is not just about getting themselves dry. It is also about saving their lives. Being wet makes animals heavier, and that makes it harder to run. In the animal world, how fast an animal can run often decides whether it will live or not. Maybe that's why the "wet-dog shake" has become a common habit of many animals.

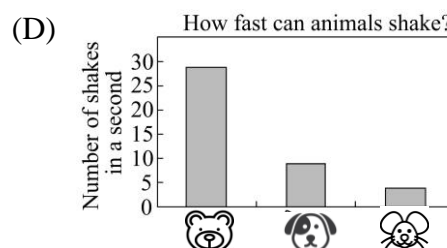

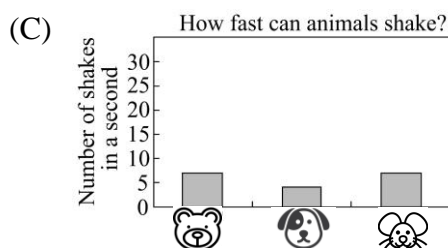

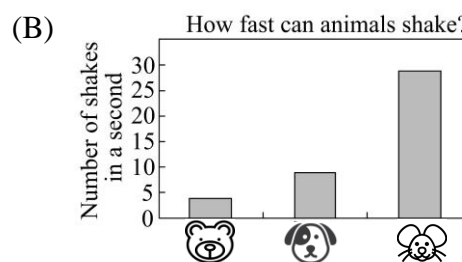

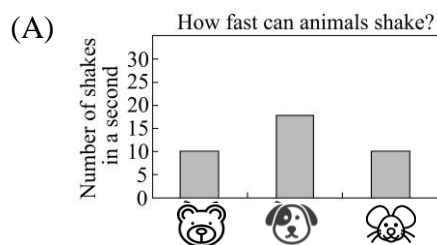

35. What can we learn from the reading?

- (A) The idea of washing machines came from the shaking of dogs.
- (B) Animals begin the shaking from their tails and end with their heads.
- (C) After shaking off, the animals can run faster and easier to save their lives.
- (D) Smaller animals make themselves drier than larger animals at each shake.

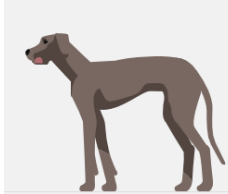

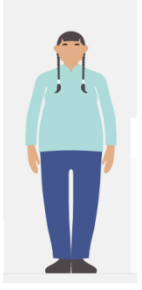

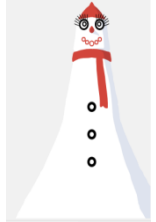

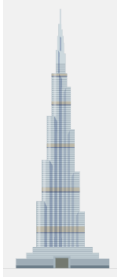

36. The four pictures below show how fast bears, dogs and rats can shake. From the reading, which is most likely correct?

likely 可能地
