第三部分：題組（題號 31~40，共 10 題，每題 2 分，共 20 分）

請依據選文，選出一個正確或最佳的答案。

I. (31)

Raising animals creates a lot of greenhouse gas. It isn't that friendly to our earth. Dr. Mark Post and his team grow meat in labs to fix the problem. They take cells from animals and then grow them into meat. By doing so, we can get cleaner meat. Many people think it tastes like real meat after they try it.

( ) 31. According to the report, which is the right order to grow lab meat?

(A) b → c → d → a

(B) d → b → c → a

(C) a → b → c → d

(D) d → c → a → b

II. (32~34)

The earth is getting warmer with 32 greenhouse gases in the atmosphere. To better understand how greenhouse gases heat up our earth, we should first know what a greenhouse is and how it works. A greenhouse is a special house made of glass for plants. It holds the heat of the sun so that the plants inside can grow better. Some gases in the atmosphere work like a greenhouse and can keep the heat from the sun, so we call them greenhouse gases. Greenhouse gases help our earth 33 warm enough for animals and plants. In fact, our earth would be too cold for life without greenhouse gases.

There is, however, a big problem. More greenhouse gases than our earth needs are entering the atmosphere because of the way we live. For example, with a greater number of cars, there is too much  $CO_2$ , a kind of greenhouse gas. Also, raising farm animals creates a lot of  $CH_4$ , another greenhouse gas. If we want to "cool down" our earth, a good start is to change our way of life, 34.

(B) worse and worse  
(C) more and more  
(D) better and better
- ( ) 33. (A) raise  
(B) stay  
(C) leave  
(D) lose
- ( ) 34. (A) like driving less and eating less meat  
(B) like driving more and eating less meat  
(C) like driving more and eating more meat  
(D) like driving less and eating fewer vegetables

III. (35~36)

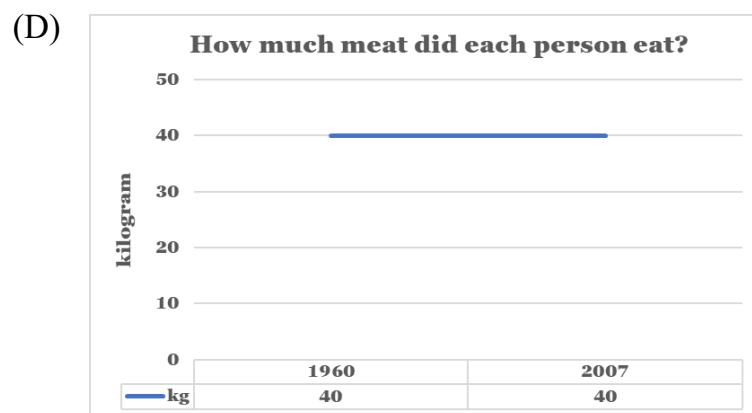

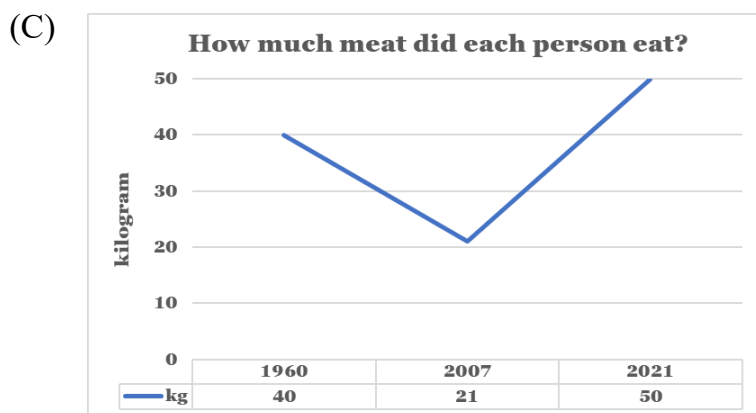

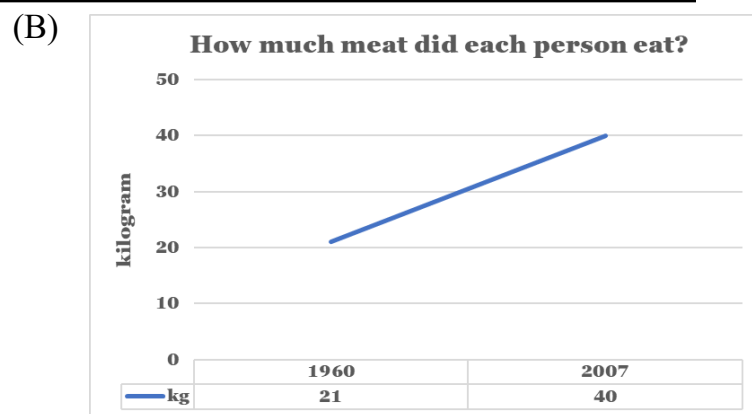

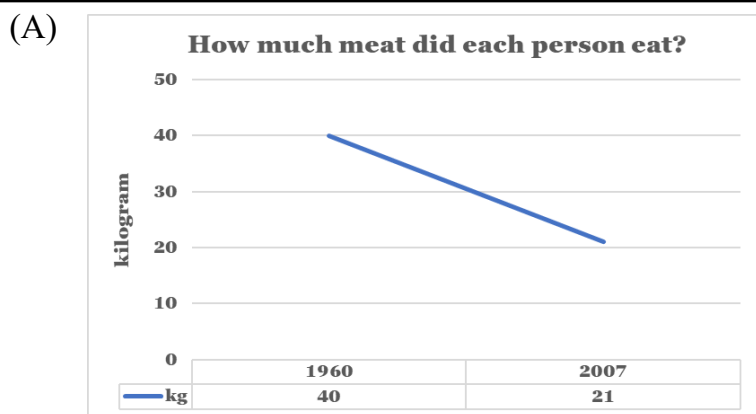

Do you eat meat? Well, if you do, then you might find our next piece of news interesting. A study says that the world has a growing need for meat. In 1960, the world ate 64 million tonnes of meat, about 21 kg for each person. In 2007, the number rose to 268 million tonnes, about 40 kg for each person. At the same time, there are some changes in the list of favorite meats. In the 1960s, beef was high on the menu. Of the meat that was eaten, 40% was beef. In 2007, pork became the star. Poultry also became popular, going up from 12% to 32%, thanks to people's worries about their health these years. And which country uses up the most meat? You guessed the USA, right? No! The answer is Luxembourg! In 2007, each Luxembourger ate about 137 kg of meat! Second to Luxembourgers are Americans. In 2007, each American ate about 126 kg! Now, enough with the numbers. I'm playing you a song called *Currywurst*. The singer sings about his love for the meat dish of the same name. Enjoy!

( ) 35. Which line chart best shows the following words?

A study says that the world has a growing need for meat. In 1960, the world ate 64 million tonnes of meat, about 21 kg for each person. In 2007, the number rose to 268 million tonnes, about 40 kg for each person.

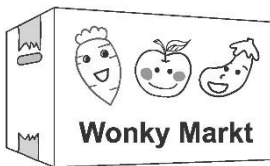

( ) 36. What do we know from the reading?

- (A) Luxembourg is the world's biggest meat maker.
- (B) Of all the meat, beef is always the star on the menu.
- (C) People in Luxembourg eat more meat than people in any other country in the world.
- (D) The world has a growing need for meat because people are worried about their health these years.

IV. (37~38)

Did you see a pumpkin that looks like a nose or an apple that looks like a funny face before? They may not look great, but they taste just as good as the pretty ones. These strange-looking fruit and vegetables are called "seconds." About 20-40% of what farmers grow is not so beautiful. Sadly, these "seconds" seldom arrive at your table, but often go straight into the trash can. Why? It's because supermarkets don't want to buy them from farmers—they believe their shoppers only love beautiful things. Because of these "seconds," some farmers lose a lot of money.

Wonky Markt wishes to change this. We're helping sell these "seconds." Farmers can save them from the trash can, and you can get them at a lower price.

1. NT\$250 a box.
2. You can choose as many as six kinds of fruit or vegetables a box.
3. Service charge: NT\$50 a box.
4. No service charge if order is over NT\$1,000.

Send us photos of your delicious dishes made from our "seconds" to [oneandonly@wonkymarkt.com](mailto:oneandonly@wonkymarkt.com), and you may win our cookbook.

adapted from 106 會考

- ( ) 37. What does Wonky Markt care about?
- (A) Farmers don't know how to grow less "seconds."  
(B) People should not buy "seconds" to help farmers.  
(C) Supermarkets often sell "seconds" at a lower price.  
(D) It wants to save less beautiful "seconds" from the trash can.
- ( ) 38. What do we know about buying "seconds" from Wonky Markt?
- (A) If you buy four boxes, you have to pay NT\$1150.  
(B) You can save 20-40% if you shop for a second time.  
(C) When we buy "seconds", farmers also lose money at the same time.  
(D) To win the cookbook, you need to send photos of your dish made from "seconds".

## For Real? 3D-Printing Meat

3D bioprinting is a new way of growing meat in a lab with animal cells. It uses cells from an animal to create meat.

The famous fast food restaurant, KFC, is trying to grow meat in a way that is better for the earth. Growing meat in a lab will use less land, water, and energy. Besides, it doesn't need dangerous medicine when people use to raise farm animals to keep meat fresh. So, lab meat may be healthier than real meat.

Scientists try to make lab meat look and taste like the real one. KFC calls this kind of meat "meat of the future," and they hope more and more restaurants will use lab meat in their dishes. However, the cost of growing meat in a lab is very expensive.

- ( ) 39. What is the main idea of this news?
- (A) A person will be healthier if they eat 3D bioprinting meat.
  - (B) The look and taste of lab meat are almost the same as real one.
  - (C) There is a new way of growing meat, and it's friendly to our earth.
  - (D) We should not eat real meat because there might be dangerous medicine.
- ( ) 40. Which restaurant might want to use lab meat in their dish?
- (A) Best Hamburger. It only sells no-meat hamburgers.
  - (B) Yummy Kitchen. It has its own farm in the mountains.
  - (C) Burger Queen. Its owner doesn't want to hurt or kill animals.
  - (D) Modern Food. Their cook thinks real meat tastes more delicious.

**M: Hey, Molly, take a look at this picture. David Beckham's son is as handsome as his dad.**

**W: Well, I don't think so. David Beckham is getting older. He is over 50 years old. His son is much more handsome than him.**

**M: Anyway, both of them look quite good to me.**

**Q: What does the woman think about David Beckham?**

14.

**W: What do you like to order, Brian?**

**M: Both the burger and steak look delicious. I can't decide now.**

**W: Well, my friend ordered the steak last time and she said it is very delicious. Besides, it is more popular than the burger.**

**M: Then I'll have the steak. How about you?**

**W: I am not really hungry. I may have a beef sandwich.**

**Q: What is Brian going to order?**

15.

**M: Sharon, you have so many watches. Which one is the most expensive on the table?**

**W: The green Rolex, it costs more than 300,000.**

**M: What? 300,000? Are you kidding me? I can buy a nice car.**

**W: Well, it is very expensive, but still a lot of people want to buy it.**

**Q: Which is true?**
