4. (36~38)

What's this animal? A little bear, a big mouse, or a brown pig? In fact, this is a wombat. Wombats live only in Australia. They have short legs and a short tail. They have a big nose, small ears, small eyes, and big teeth, too. Wombats are marsupials; that is, a mother wombat has a pouch like a small bag. A mother wombat can put her baby in it. But their pouches are different. Their pouches face the back, not the front. This helps a mother wombat do things more easily.

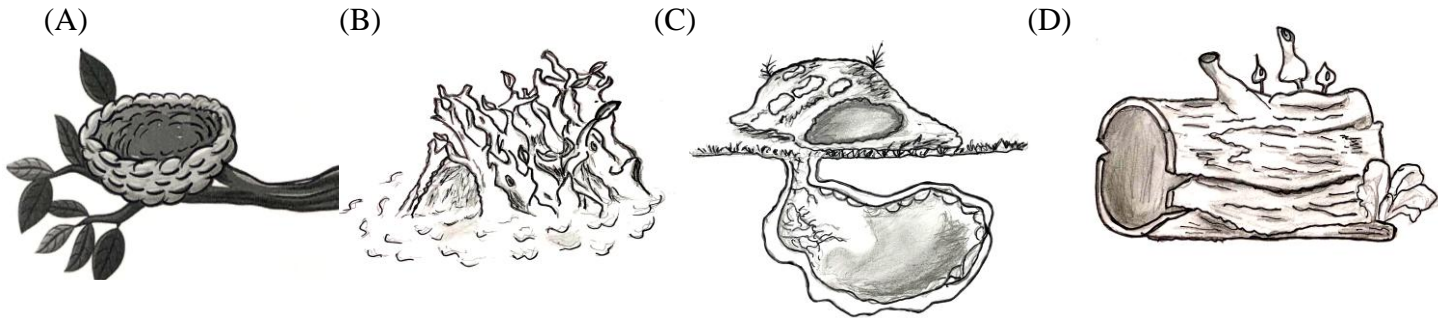

Wombats eat plants. They sleep in the day time and come out for food at night. Aren't they special? Wombats are good at digging. Their legs are short. They use their hands and feet to make holes in the ground to live in. Holes are like their homes. Wombats are so cute and special!
